

# SOLOY FIELD ELECTRICAL KIT

This new field kit includes an electrical component guide, all tools and a complete selection of spare terminals to maintain and repair the electrical harnesses included in current Soloy conversion kits.

Packed in a tough travel bag, the kit includes a selection of basic crimp, positioning, insertion and extraction tools for all current connectors used on the Soloy manufactured harnesses included in the Cessna Mk 2, SD1, and SD2 kits.

These tools are essential to allow speedy repair or alteration of contemporary electrical connectors for not only the Soloy kits but also the most other aircraft that use modern solderless connectors.

Order kit part number 766-1000-FEK

Price \$2,300.00
